

Adjustable Stabilizers/Ears

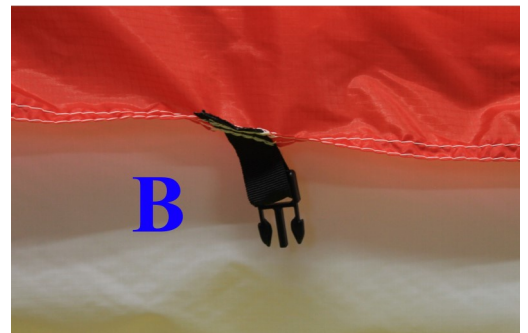

The all new adjustable stabilizers/ears enable you to use our parasails to fit your needs. Quick and easy to adjust your new parasail with our fast snap clips, located on the front of the of the stabilisers/ear, removing the need for two different styles of parasails.

To adjust your parasail locate clip A and unclip it.

Make sure the stabilizer/ear section is on the inside of the parasail.

Locate Clip B, approx. half way along the next stabilizer section.

Clip the stabilizer/ear to clip B and your done.

The stabilizer/ear will be neatly stowed behind the next stabilizer/ear section.
To reattach the stabilizer/ear section simple reverse this process.

Stabiliser/Ears Adjustment
